Projects

Travel and Tourism Management

- In the present system the customer has to approach various travel and tourism companies to get information about the places, travels, hotels where they have to stay and visit. This often requires a lot of time and efforts and even customer gets misguided few times.
- Our project solve this problem by providing free website that provide all required information to the tourist about places where they want to visit.

Language used: PHP, HTML, CSS and Javascript.

Other: Xampp, Mysql and Git.
